

La Cañada High School

A National Blue Ribbon School

Registration 2017

Dear Parents of 7-12 Science Students,

The La Canada Unified School District has approved a laboratory donation for all 7-12 students taking a science class. The purpose of this donation is to cover expendable laboratory supplies that are used by students during instruction. Donations are used to purchase live and preserved plant and animal study specimens, chemicals, and replacement equipment that become damaged during use by students, to name only a few.

The requested 7th and 8th grade science donation is \$15.00 per year. The requested 9th – 12th grade science donation is \$20.00 for ***each*** science class taken for the year. You may donate to the science lab class with cash or by writing a check to **LCUSD-Science** making sure to indicate on memo line the science teacher's name, the name of the class (7th, 8th, Chemistry, etc.), and your student's name. Please place the cash or check in an envelope with your student's name on the outside and ask your student to give the envelope to his/her science teacher.

Lab experimentation is a vital portion of our science curriculum and this donation is greatly appreciated. Thank you for helping to maintain our top caliber science program.

Sincerely,

Jonathan Lyons
Assistant Principal
